# Introduction

In line with Coillte's Recreation Policy, Coillte may, under licence, permit the use of its lands, for the hunting and shooting of wild game, deer and other quarry species.

The licensing of such activities is restricted to forest areas of low amenity use where it is not considered to compromise public safety, or where it does not interfere with forest operations or any deer or game management programmes which may be in place.

Such activities are to be carried out in strict accordance to any of Coillte's Deer and Game Management Policies, Guidelines and Codes of Practice that may be in place, as well as the conditions of the licence agreement and the Forest Management Standards for the Republic of Ireland – Second Draft.

Coillte currently issue three types of licence for recreational hunting on their lands :-

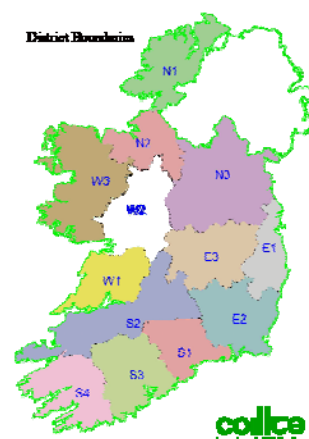

- a) **Deer Stalking Licence** – to permit access for the hunting and shooting of wild deer for the period 1<sup>st</sup> September – 28<sup>th</sup> February annually for a maximum period of 5 years
  
- b) **Rough Shooting Licence** – to permit access for the hunting and shooting of wild game and other wild quarry species\* (except deer) for the period 1<sup>st</sup> September – 28<sup>th</sup> February annually for a maximum period of 5 years. Access outside this period is subject to local agreement with the relevant Forest Manager.
  
- c) **Reared Game Licence** – to facilitate release programmes of reared gamebirds and to permit the hunting and shooting of such game and other wild quarry species\* (except deer) for a maximum period of 5 years.

\* The hunting and shooting of Red Grouse is subject to the implementation of an agreed grouse management plan aimed at ensuring the sustainability of local grouse populations.

The allocation of such licences is subject to an open tender competition using a “sealed bidding system”. Forest areas are advertised centrally on an annual basis as they become available and tenders are processed locally by the relevant forest District personnel (see fig 1).
